

## DIT215 H16 – Template for the Second Report

### Cover page

Team number, Title of your DSS, Supervisor, Team members (name and personnummer)

### Scan of Individual Contribution Form (with signatures)

In this form you report the contribution of team members to *this written report*.

The template is provided on the course portal. Do not forget to hand in the signed original to the teacher.

A more detailed account of the overall work done during Assignment 2 (per Sprint) is given in Appendix II.

### Section 1 – Introduction (0.5 page)

Provide a recap of the goals and main functionality of your DSS.

### Section 2 – Backlog summary

Summarize the stories you implemented (2/3 lines per story), and group them into Sprints (which stories were implemented in which sprint). This info should be in Trello already.

Also discuss and motivate the changes to the backlog w.r.t. Assignment 1, if any. Have some stories been dropped? Replaced or modified? Added? Why? Have some stories changed their importance? How come?

### Section 3 – Database structure (1-2 pages)

Describe the tables you have in your database.

### Section 4 – User-oriented description of the DSS (5 pages)

Describe to the user(s) how to interact with your DSS. You can also include some screenshots. If you have multiple types of user (e.g., administrator and customer), create a subsection for each. The explanation must be clear for non-technical users.

### Section 5 – Technical description (5-7 pages)

The intended audience of this part is the developer who has to maintain your system (i.e., perform changes, fix bugs, etc). Provide a description of the “innards” of your system, including for instance:

- The overall structure of your code (e.g., packages you used).
- Description of where the important functionality is located.
- Role of each class.
- The SQL query you have used.
- Extra libraries you used, if any (and how/why).

### Section 6 – Reflections (1-2 pages)

For instance, include a reflection on the challenges you faced (both technical and related to the team management) and how you resolved them.

Think to how you would do things differently if you had the chance to do the project all over again.

### Appendix I – Team activity

List the meetings the team had, and their attendance by team members.

Attended meetings	Sprint 1 (out of 6)	Sprint 2 (out of 9)	...	Notes (if any)
Name of member 1	5	9		
Name of member 2	6	8		
...	...	...		

### Appendix II - Responsibilities

Per Sprint, describe who did what, precisely. This information should be available on your Trello already. In particular, include a table like the following one:

	Sprint 1			
	Who was responsible	Delivered	Integrated	Notes (e.g. reason for <u>not</u> having delivered or integrated)
Task or feature description (concise, but understandable)	Member xyz	yes	no	Had too many bugs
...	...
